# DRUMS

## D-series drums for screening & crushing

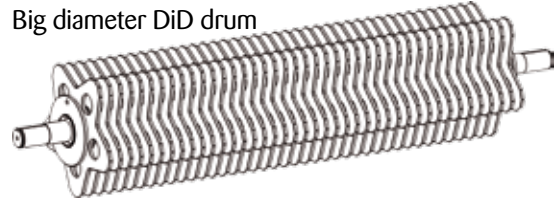

40 mm or 60 mm

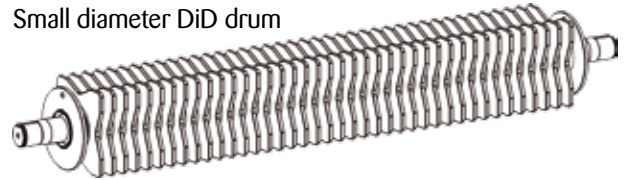

X75 & X100

## D-series drums for fine screening

Big diameter DiD drum

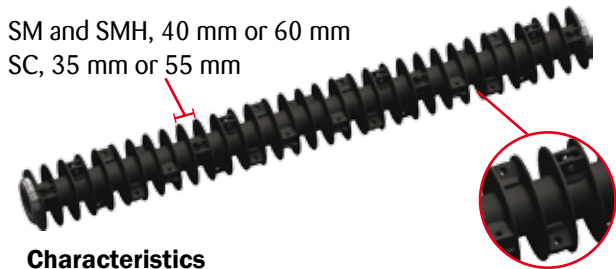

Small diameter DiD drum

## SM, SMH and SC drums

SM and SMH, 40 mm or 60 mm  
SC, 35 mm or 55 mm

### Characteristics

- Disc distance in SM SMH models 40 mm or 60 mm
- Disc distance in SC models 35 mm or 55 mm
- Disc thickness 6 mm (regular) or 10 mm (XHD)
- Changeable blades

### Applications

- Can be used in most screening, crushing and mixing applications
- For customers who want to use the same bucket for different jobs

## X75 & X100

### Characteristics

- Excellent mixing and pulverization capability combined with crushing effect
- Clog-proof construction suitable
- High processing capacity

### Applications

- Mixing and stabilisation of masses
- Crushing
- Pre-screening, pulverizing

# SPECIAL DRUMS

## 20 mm drums

Changeable blades

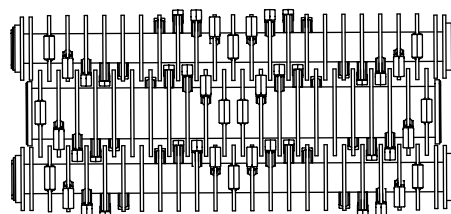

Universal blade

### Characteristics

- Fragment size down to 20 mm
- Clog-proof construction fits well for wet materials.
- Changeable blades
- Suitable for buckets with three drums.

### Applications

- Backfilling of pipeline trenches
- Processing of soil
- Applications that require finer fragment size

# BLADES D -series, SM & SMH

## 60/40 mm universal blade

Basic blade that fits several applications and materials. Good durability.

## 60/40 mm long blade

Special blade for e.g. aerating and screening compost. For ALLU with three or four drums located in the middle drums.

## 60/40 mm axe blade

Special blade for crushing compost, biowaste and bark.

## 60/40 mm oval blade

Special blade for rocky and consuming material, e.g. moraine.

## SM and SMH counter blades

Available models: straight and comb.

# BLADES SC

## 55/35 mm universal blade

Basic blade that fits several applications and materials. Good durability.

## 55/35 mm long blade

Special blade for e.g. aerating and screening compost. For ALLU with three or four drums located in the middle drums.

## 55/35 mm axe blade

Special blade for crushing compost, biowaste and bark.

## 55/35 mm oval blade

Special blade for rocky and consuming material, e.g. moraine.

## SC counter blades

Available models: straight and comb.
